List of Tables

Table 1: Examples of Polycarbonate Products	28
Table 2: Ballistics Abbreviations	37
Table 3: National Institute of Justice (NIJ) Standard 0108.01 Ballistic Resistant Protective Material	38
Table 4: Underwriters Laboratories (UL) 752 Ballistic Standards	39
Table 5: ASTM F 1233 Standard Test Method for Security Glazing Materials and Systems	40
Table 6: H.P. White Laboratories HPW-TP-0500.03 Transparent Materials for Use in Forced Entry or Containment Barriers	40
Table 7: U.S. and International Standards Comparison	42
Table 8: Glazing Performance Condition Description	47
Table 9: Side-by-Side Comparison of Test Methods	51
Table 10: Designations and Tools for Entry	54
Table 11: Fire-Rated Glazing Product Comparison Chart	72
Table 12: Impact Test Criteria: Large Blunt and Sharp Impactors	76
Table 13: Impact Test Criteria: Torch and Small Blunt Impactors	77
Table 14: Typical Protocol for Windborne Debris Impact and Cyclical Tests	84
Table 15: Typical Interlayer for Hurricane Performance	85
Table 16: Dynamic Racking Performance of Laminated Glass	87
